FAGERHOLM - practical guidance & safety information

Please review this for your personal guidance and safety before arriving at Fagerholm Island.

Safety at sea, near sea and at Jetty

You are personally responsible for your safety during your visit at Fagerholm.

We recommend that you use a life-vest when boarding and do not move around or stand unnecessarily in a boat. Follow always the skipper's instructions promptly on-board.

Watch Your step

When you move around the island, remember that for example rocks, wooden surfaces on jetty's are especially slippery when wet. There are places on the island where smaller kids should not be left alone. Never jump from boats, - as a boat is not a firm platform and will move with your movements.

You are in the nature

Especially in the south-western area of the island, a lot of birds nest and will in spring and early summer try to discourage persons to come too close to their nests, to the degree that some birds come very close and could even try to hit you. If you hear a bird getting very upset, you are probably approaching their nest, so move away from that area. Do not walk in areas with longer grass or vegetation, as there could be "mite's" or occasional snakes.

Remember - it's an island

Fire and smoking are main risks at an island, - as help will NOT be arriving in case of a fire ! We recommend you not to smoke while at Fagerholm, but if you do, secure that you act very responsibly and that no parts of cigarettes are ever left anywhere in the nature at the Island.

Sound travels especially well over water, so if the wind is towards another island, our sound and noise can well be heard a kilometer away.

We are making all the fresh water we use at the island, out of salt water, so water is a scarce resource. Remember when showering etc. that you are on an island ! Everything consumed on the island is brought there by ship (oil, food-stuff, fire-wood etc.) and all trash and garbage are separated into a) burning, b) composting or c) things to be transported away from the island, - so we try not to "consume" as on the mainland and we always separate all trash.

Littering & smoking

Secure that you do not litter and in case you have the bad addiction of smoking, - that you only do it at safe places and secure that any cigarette remains are properly disposed !

E n j o y

Enjoy Your time at Fagerholm island ! Remember that a positive attitude solves most issues.
